

Dear students,

Our waterways need your help!

South East Queensland is blessed with stunning beaches, extensive estuaries, huge sand islands and many kilometres of freshwater streams.

The waterways of our Brisbane catchments flow directly into Moreton Bay which is recognised as an international Ramsar wetlands site for its waterway biodiversity.

But, some of these catchments received an F in the Ecosystem Health Monitoring Program Report Card!

All of us have an impact on the health of our waterways and catchments.

There are many positive things you can do to help. One of these is to learn about your local waterway environment and this is what we would like to invite you to do.

If we work together we can all make a difference!

Regards,

Communication, Education and Motivation Team

Healthy Waterways
