

Multi-species cropping & soil health field day | Esk

Come along and learn about the local Landcare multi-species cropping trial, which aims to demonstrate how regenerative farming practices can improve soil health and biological activity and function.

Presenters including agricultural consultant David Hall, Microbiologist Dr Sandra Tuszynska and landholder Reg Pease.

Main topics will include:

- Regenerative farming practices including use of multi-species crops and pasture cropping.
- Soil health and soil microbiology including an overview of initial trial findings.
- How to make your own compost and apply biological inoculations.
- Demonstration of zero-fill seed drill planting winter crop into standing and mulched multi-species crop

Wednesday 5 May 2021

9:00 am – 1:30 pm
Including smoko & BBQ lunch

6012 Brisbane Valley Highway,
Esk

Bookings are essential. Please register by 30th April by emailing rsvp@hlw.org.au, noting any special dietary requirements

We will be heading out into the field as part of this event, so please make sure:

- Your vehicle is clean and free of weeds to minimise any biosecurity risks.
- Wear appropriate clothing, footwear, and a sunsmart hat for the field session
- Notebook and pen
