

NEW DATE | Soil conservation planning & gully erosion repair field day | Mt Forbes

This event has been postponed from 25 May to 15 June 2021 due to bad weather.

Landholders interested in learning about soil conservation plans, how to implement soil conservation works as well as cost effective measures to control erosion and improve pasture condition on their properties are invited to attend Healthy Land and Water's **free** soil conservation and gully erosion and pasture management field day at Mt Forbes.

There will be machinery on site for the day, demonstrating how to implement soil conservation works and attendees will also have the opportunity to inspect recently completed small scale projects designed to control historic gully erosion. There will be opportunities to discuss options and practical management practices to reduce erosion and maintain good pasture and land condition.

Topics will include:

- Soil conservation planning at both catchment and property scales.
- Implementing soil conservation works on your property.
- Small scale, cost effective gully erosion control options.

For more information call or email Bruce Lord on 0427 013 284 or bruce.l@hlw.org.au or Samille Loch-Wilkinson on 0400 910 128 or samille.lw@hlw.org.au.

WHEN

Tuesday 15 June, 9am – 3pm

WHERE

Mt Forbes – Exact address will be provided upon registration
